

Angel Dry Polishing Bench Dust Collector 220V

The Angel Dry Polishing Bench Dust Collector is a powerful, heavy-duty polishing bench designed with an adjustable air filtration system to effectively recover precious metal dust throughout the grinding and finishing processes. This compact unit can handle a wide range of polishing operations with ease. Made in Italy.

FEATURES

- Exceptionally high percentage of precious metal recovery while using polishing wheels or brushes
- Creates safe and clean working conditions for the operator
- Comfortable operator positioning for increased work speed and efficiency
- Significant lighting in the polishing area with minimal noise emission
- Adjustable polishing motor speed (600 to 3,600 rpm) with digital speed meter display
- Adjustable power intensity for the air suction
- Safe and convenient forward-backward rotation mechanism for fitting and/or replacing mandrels for brushes or wheels
- Short polishing shafts to avoid vibrations during polishing
- Additional lamp for improved lighting in the work area
