# RMGO! Rhodium + Gold Plating Kits by Jentner

High-Quality Plating Made Easy

# RMGO! One-Button Plating System

## Rhodium plating as easy as 1, 2, 3

### RMGO! Plating Kits

[See price here](#)

Electro-clean and electro-plate with gold and rhodium using Jentner's new rhodium machine, the RMGO! Pre-installed times and voltages ensure perfect coatings without any precious metal waste. Plating solutions sold separately.

**1.**

Choose time  
(30, 60, or 90 seconds)

**2.**

Place your pieces in beakers  
for degreasing and plating

**3.**

Push Go!

#### Advantages:

- Absolutely safe process as the voltage needs not to be set – easy handling by only one GO! button
- Errors are avoided as no voltage needs to be set
- More than 1000 rings with 1 liter. Rhodium solution JE88 and an ultra brilliant white shining surface
- A deposition time of 36 sec instead of 30 sec costs you 20% more of your expensive rhodium!
- That is a cost saving of 0.2 g rhodium at 1000 rings if you plate exactly 30 sec.

RMGO! Kits	Rhodium Plating 210-0014	Gold Plating 210-0016	Deluxe 210-0018

## Digital V Compact Electroplating Systems

[See price here](#)

The Digital II and Digital V Compact Plating Systems come pre-programmed with adjustable coating processes that represent a new standard in easy, high-quality plating. The Jentner team even pre-adjusted the voltages to eliminate any guesswork.

The compact Digital II Version 2.0 has eight 1.5-liter tanks for cleaning and plating and the more robust Digital V has four 5-liter and four 2-liter tanks. Both are ideal for heavy gold and flash plating and can be used for all current galvanic baths including cold electro cleaning and cold gold plating baths, bright silver and rhodium baths, palladium or ruthenium baths.

### Features:

- Adjustable programs for easy, consistent results
- Intuitive controls and display
- Integrated countdown function to prevent overplating
- Welded metal body with integrated splash-guard for user protection
- Compatible with two flexible heaters
- Efficient electroplating with convertible tanks
- Dual voltage: 110V 60Hz / 220V 50Hz

## Picco Pen Plater

[See price here](#)

The Picco Pen Plater lets you apply rhodium, gold, or silver to small items that would be time consuming to plate like fancy shaped blanks, findings, and settings. Jentner built the rectifier into the stainless steel case for a remarkably space-saving design. Dual voltage: 110V / 220V.
